

PTC MKS Toolkit 10.0 Patch 1 and PTC X/Server 10.0 Patch 1 have Released! May 24, 2016

Ease integration of UNIX, Linux and Windows-based computers with PTC MKS Toolkit products, and easily accomplish all your UNIX/Windows OS Integration Tasks with PTC X/Server!

With PTC MKS Toolkit as the leader in UNIX to Window scripting, connectivity, and application migration, and PTC X/Server as a high-performance, transparent PC X server that delivers seamless integration between the Windows desktop and the UNIX/Linux – together they improve performance and support the latest standards while maximizing application compatibility and minimizing the need for specialized configurations.

The following new features, fixes, and enhancements are now available with PTC MKS Toolkit 10.0 Patch 1 and PTC X/Server 10.0 Patch 1 releases:

- PTC MKS Toolkit works correctly with Windows 10 Release 1511
- OpenSSL has been updated to 1.0.1r
- Added support for Intel Compilers 2015 & 2016
